

Digital Vehicle Inspection

Test Procedures — Tester's Copy

System: D1 Imports CRM (redlined1.com) | Feature: Digital Inspections (DVI) | Date: June 2026

LEGEND: Each step has an ACTION (what to do), EXPECTED RESULT (what should happen), and a checkbox %i for the tester to mark pass/fail. = important caveat or prerequisite.

SECTION 1 — Prerequisites & Navigation

Verify access and initial state

1.1 Login & Navigate

1	ACTION Log in as Owner role at redlined1.com	EXPECTED RESULT Dashboard loads. Sidebar visible with all modules.	☐
2	ACTION Click "Inspections" in the left sidebar	EXPECTED RESULT "Digital Inspections" module opens. Header reads "Digital Vehicle Inspections".	☐
3	ACTION Check the 4 stat cards at the top of the page	EXPECTED RESULT Cards show: Total Inspections, In Progress, Completed, Needs Approval — all with numeric values (0 or real counts).	☐

1.2 Empty State

4	ACTION If no inspections exist, observe the list panel	EXPECTED RESULT Message reads "No inspections yet." — no crash or blank white area.	☐
---	--	---	--------------------------

SECTION 2 — Create New Inspection

Test full form creation flow

2.1 Open New DVI Form

5	ACTION Click the "+ New DVI" button	EXPECTED RESULT Form panel slides in on the right. Inspection # auto-assigned (e.g. DVI-0001). Status defaults to "In Progress".	☐
6	ACTION Verify the Inspection # format & If inspections were previously deleted, number must still be higher than any existing DVI number.	EXPECTED RESULT Number follows DVI-XXXX pattern. No collision with existing records.	☐

2.2 Customer & Vehicle Fields

7	ACTION Click the Customer dropdown and select an existing customer	EXPECTED RESULT Customer Name field auto-fills with selected customer's name.	☐
8	ACTION Observe the Vehicle field after selecting a customer with registered vehicles	EXPECTED RESULT Vehicle field becomes a dropdown listing that customer's registered vehicles.	☐
9	ACTION Select a vehicle from the dropdown	EXPECTED RESULT VIN field auto-populates if the vehicle has a VIN on record.	☐
10	ACTION Clear the customer selection, then type manually in Customer Name and Vehicle fields	EXPECTED RESULT Both free-text inputs accept typing. Form remains valid.	☐

2.3 Other Header Fields

11	ACTION Enter a VIN number manually (e.g. 1HGCM82633A123456)	EXPECTED RESULT VIN field accepts input. No validation error on valid format.	☐
----	---	---	--------------------------

12	ACTION Enter a mileage value (e.g. 75000)	EXPECTED RESULT Mileage field accepts numeric input only.	☐
13	ACTION Click the Technician dropdown & If no members have been added, field falls back to a free-text input instead.	EXPECTED RESULT Dropdown lists team members from the Members list (name formatted from email). Option "— select technician —" shown at top.	☐
14	ACTION Select a technician from the dropdown	EXPECTED RESULT Selected technician name appears in the field.	☐
15	ACTION Enter a customer email address (e.g. customer@test.com)	EXPECTED RESULT Email field accepts the value with no error.	☐
16	ACTION Enter a customer phone number	EXPECTED RESULT Phone field accepts the value.	☐

2.4 Inspection Checklist

17	ACTION Scroll down to the checklist items under the form fields	EXPECTED RESULT Items are grouped by category: BRAKES, TIRES, FLUIDS, LIGHTS, UNDER HOOD, SUSPENSION.	☐
18	ACTION Click "Pass" on the Front brake pads item	EXPECTED RESULT Button highlights green. Item status changes to Pass.	☐
19	ACTION Click "Attention" on Rear brake pads	EXPECTED RESULT Button highlights orange. A "Notes..." text field appears for that item.	☐
20	ACTION Type "Worn, ~2mm remaining" in the notes field	EXPECTED RESULT Text saves in the field. Notes box visible only for Attention/Fail items.	☐
21	ACTION Click "Fail" on Front rotors	EXPECTED RESULT Button highlights red. Notes field appears. Pass/Attention buttons deselect.	☐
22	ACTION Click "N/A" on Tire pressure	EXPECTED RESULT Button highlights grey. Notes field disappears.	☐
23	ACTION Leave several items as N/A (default)	EXPECTED RESULT No error on save for N/A items.	☐

2.5 Save the Inspection

24	ACTION Leave Customer Name or Vehicle blank, click "Create Inspection"	EXPECTED RESULT Error message: "Customer and vehicle are required." Form does not submit.	☐
25	ACTION Fill in required fields and click "Create Inspection"	EXPECTED RESULT Spinner shows briefly. Form closes. New inspection appears in the list panel on the left.	☐
26	ACTION Check the stat card for "Total Inspections"	EXPECTED RESULT Count increments by 1.	☐

Ø=Üi The newly created inspection should be selected automatically in the list and shown in the detail panel.

SECTION 3 — View Inspection Detail

Verify detail panel and summary badges

27	ACTION Click on the newly created inspection in the list	EXPECTED RESULT Right panel shows the full inspection detail: number, customer, vehicle, technician, mileage.	☐
28	ACTION Observe the 4 coloured summary badges (Fail / Attention / Pass / N/A)	EXPECTED RESULT Counts match the statuses set during creation. Colours: red=Fail, orange=Attention, green=Pass, grey=N/A.	☐
29	ACTION Scroll through the detail checklist	EXPECTED RESULT Items grouped by category. Each shows a coloured dot, item name, status label. Notes visible where entered.	☐
30	ACTION Verify items marked "Fail" show red label and dot	EXPECTED RESULT Visual is clearly red. No orange or green shown for Fail items.	☐

SECTION 4 — Edit Existing Inspection

Verify edits are persisted correctly

31	ACTION With an inspection selected, click "" Fill Out / Edit"	EXPECTED RESULT Form opens pre-filled with all existing values: customer, vehicle, VIN, mileage, technician, checklist items, notes.	☐
32	ACTION Change the vehicle field to a different value	EXPECTED RESULT Field accepts new input.	☐
33	ACTION Change the status of 2 checklist items	EXPECTED RESULT Buttons update visually. Notes fields appear/disappear as expected.	☐
34	ACTION Add text in the Overall Notes field	EXPECTED RESULT Textarea accepts the text.	☐
35	ACTION Click "Save Changes"	EXPECTED RESULT Form closes. Detail panel refreshes showing updated vehicle, notes, and checklist statuses.	☐
36	ACTION Re-open the inspection (click it in the list, then Edit) & This verifies Bug Fix #2: vehicle/VIN/customer fields now correctly save to the database.	EXPECTED RESULT All changes from the previous save are persisted — vehicle, notes, and item statuses all show the edited values.	☐

SECTION 5 — Photo Upload

Requires an existing (saved) inspection in Edit mode

37	ACTION Open an existing inspection in Edit mode (" Fill Out / Edit)	EXPECTED RESULT Form loads. Camera icons " visible on each checklist item row.	☐
38	ACTION Click the " icon on any checklist item	EXPECTED RESULT OS file picker opens. Select any image file (JPG, PNG).	☐
39	ACTION Select an image and confirm	EXPECTED RESULT "... " spinner shows briefly on that item. Then icon changes to " " indicating upload success.	☐
40	ACTION Click "Save Changes"	EXPECTED RESULT Inspection saves with photo attached.	☐
41	ACTION Return to detail view and click the " link on that item & Photo upload only works when editing an existing inspection (not on brand-new unsaved forms).	EXPECTED RESULT Image opens in a new browser tab. Correct photo displayed.	☐

SECTION 6 — Mark Complete

Test status workflow transition

42	ACTION Select an "In Progress" inspection from the list	EXPECTED RESULT Detail panel shows. " Mark Complete" green button visible in action bar.	☐
43	ACTION Click " Mark Complete"	EXPECTED RESULT Status changes to "Completed". Badge in list panel turns green. "Mark Complete" button disappears from action bar.	☐
44	ACTION Verify a " Create Estimate !" button now appears	EXPECTED RESULT Blue button "Create Estimate !" replaces the "Mark Complete" button for completed inspections.	☐

45	ACTION Check the Completed stat card at the top	EXPECTED RESULT Count increments by 1. In Progress count decrements by 1. ☐
----	---	--

SECTION 7 — Customer Report Preview

Test the print/preview modal

46	ACTION Select any inspection and click "☰ Customer Report"	EXPECTED RESULT Full-screen modal opens with branded print layout: logo (if set), company name, inspection number. ☐
47	ACTION Verify the 3 summary badges in the modal (FAIL / ATTENTION / PASS)	EXPECTED RESULT Counts match what is shown in the detail panel. Colours correct. ☐
48	ACTION Scroll through the modal checklist	EXPECTED RESULT Items grouped by category. Photo thumbnails (40×40px) shown where photos were uploaded. Notes shown in grey text. ☐
49	ACTION Click "☰ Print"	EXPECTED RESULT Browser print dialog opens. Modal closes. Print preview shows the report cleanly formatted. ☐
50	ACTION Click "☰ Close"	EXPECTED RESULT Modal closes. Underlying page visible. ☐

SECTION 8 — Email Report

Requires RESEND_API_KEY configured and customer email on record

51	ACTION Select an inspection that has a customer email address	EXPECTED RESULT "☰ Email Report" button in action bar appears fully opaque (not greyed out). ☐
52	ACTION Select an inspection with NO customer email	EXPECTED RESULT "☰ Email Report" button is greyed out / disabled with tooltip "No customer email on file". ☐
53	ACTION Click "☰ Email Report" on an inspection with a valid email	EXPECTED RESULT Button shows "...Sending" briefly. Toast notification: "Report sent to [email]". ☐
54	ACTION Check the recipient's inbox <i>& Email delivery may take up to 2 minutes. Check spam folder if not received.</i>	EXPECTED RESULT Email arrives from noreply@redlined1.com. Subject contains the inspection number and shop name. Body shows categorised checklist with Pass/Attention/Fail items highlighted. ☐

SECTION 9 — Shareable Customer Link

Test public share token generation

55	ACTION Select any inspection and click "☰ Share Link"	EXPECTED RESULT Button shows "... " briefly. A purple URL bar appears below the action bar. ☐
56	ACTION Verify the URL format in the bar	EXPECTED RESULT URL is: https://redlined1.com/inspection/[32-char-token] ☐
57	ACTION Click the "Copy" button in the URL bar	EXPECTED RESULT Button text changes to " Copied!" for 3 seconds. URL copied to clipboard. ☐
58	ACTION Paste the URL in a new browser tab (or incognito window)	EXPECTED RESULT Public inspection page loads WITHOUT requiring login. Shows customer-friendly layout with shop branding, summary badges, and full checklist. ☐

59	ACTION Verify the public page shows correct data	EXPECTED RESULT Customer name, vehicle, all checklist items with colour indicators, and any uploaded photos visible. ☐
60	ACTION Click "Ø=Ý Share Link" again on the same inspection	EXPECTED RESULT Same token returned (not a new one). Same URL shown. ☐

SECTION 10 — Create Estimate from Inspection

Test cross-module navigation

61	ACTION Mark an inspection as Completed (Section 6 above)	EXPECTED RESULT "☐=ÜË Create Estimate !" button appears in action bar.	☐
62	ACTION Click "☐=ÜË Create Estimate !" button	EXPECTED RESULT App navigates to Estimates module. New estimate form pre-fills with customer name, customer ID, and inspection reference.	☐
63	ACTION Verify customer name is pre-filled in the estimate form	EXPECTED RESULT Customer name matches the inspection. No manual re-entry needed.	☐

SECTION 11 — Job Card !' DVI Integration

Test prefill from Job Cards module

64	ACTION Navigate to Job Cards module	EXPECTED RESULT Job Cards list loads.	☐
65	ACTION Create a new job card (or use an existing one)	EXPECTED RESULT Job card created and visible in list.	☐
66	ACTION Click on a job card to view its detail panel	EXPECTED RESULT Detail view opens on the right.	☐
67	ACTION Click the "☐=Ý Start DVI !" button in the job card detail	EXPECTED RESULT App navigates to Inspections module. New DVI form opens pre-filled with the customer name, vehicle, and Job Card ID from that job card.	☐
68	ACTION Verify the Job Card ID field is populated in the DVI form	EXPECTED RESULT Field shows the correct job card reference (e.g. JC-xxxxxxxxxx).	☐
69	ACTION Complete and save the DVI	EXPECTED RESULT Inspection saved. Job Card ID stored and visible in inspection detail.	☐

SECTION 12 — Search & Filter

Test list controls

70	ACTION Type a customer name in the Search field	EXPECTED RESULT List filters in real time — only inspections matching the name shown.	☐
71	ACTION Type an inspection number (e.g. DVI-0001)	EXPECTED RESULT Matching inspection shown.	☐
72	ACTION Type a vehicle name (e.g. Toyota)	EXPECTED RESULT All inspections for Toyota vehicles shown.	☐
73	ACTION Clear search and use the Status dropdown filter — select "Completed"	EXPECTED RESULT Only completed inspections shown in list.	☐
74	ACTION Select "In Progress" from the filter dropdown	EXPECTED RESULT Only in-progress inspections shown.	☐
75	ACTION Select "All" to reset	EXPECTED RESULT Full list restored.	☐

SECTION 13 — Delete Inspection

Verify deletion and list update

76	ACTION Select any inspection in the list	EXPECTED RESULT Detail panel shows. "Delete" button visible at far right of action bar (red text).	☐
77	ACTION Click "Delete"	EXPECTED RESULT Browser confirm dialog: "Delete DVI-XXXX?"	☐
78	ACTION Click Cancel in the confirm dialog	EXPECTED RESULT Nothing happens. Inspection remains.	☐
79	ACTION Click Delete again, then confirm OK	EXPECTED RESULT Inspection removed from list. Next inspection in list auto-selected (or empty state if none remain).	☐
80	ACTION Create a new DVI after deletion & This verifies Bug Fix #1: number generation uses MAX not COUNT.	EXPECTED RESULT New DVI number is higher than any remaining number — no re-use of the deleted number.	☐

SECTION 14 — Customisable Template (Owner Only)

Test Settings !' DVI Template

81	ACTION Navigate to Settings module	EXPECTED RESULT Settings page loads.	☐
82	ACTION Scroll to the "DVI Inspection Template" panel	EXPECTED RESULT Panel shows current checklist items grouped by category. Default 26 items across 6 categories.	☐
83	ACTION Click "ÿ Add Item" — enter Category: "Engine" and Name: "Timing belt condition"	EXPECTED RESULT New item added to the list immediately in the UI.	☐
84	ACTION Click "Save Template"	EXPECTED RESULT Toast: "Template saved." Success indicator shown.	☐
85	ACTION Navigate back to Inspections and click "+ New DVI"	EXPECTED RESULT New DVI form checklist includes the custom "Engine / Timing belt condition" item.	☐
86	ACTION Return to Settings !' DVI Inspection Template, click "Reset to Default"	EXPECTED RESULT Confirm dialog shown. On confirm, template reverts to original 26 items. Custom items removed.	☐
87	ACTION Create a new DVI after resetting	EXPECTED RESULT Checklist uses original default items — no custom items appear.	☐

SECTION 15 — Role-Based Access

Test technician role restrictions

88	ACTION Log out and log back in as a Technician role	EXPECTED RESULT Technician dashboard loads with limited sidebar modules.	☐
89	ACTION Navigate to Inspections (if accessible)	EXPECTED RESULT DVI module loads. Technician can view and fill out inspections.	☐

90	ACTION Verify technician cannot see financial data in Parts module	EXPECTED RESULT Cost, Retail, and Margin columns hidden. No dollar values visible to technician.	☐
91	ACTION Log back in as Owner to restore full access	EXPECTED RESULT All modules and data visible again.	☐

SECTION 16 — Multi-Location Isolation

Verify inspections are scoped per shop/location

92	ACTION Switch to Location 2 using the shop switcher in the sidebar	EXPECTED RESULT Sidebar shows Location 2 active. Inspection list reloads.	☐
93	ACTION Verify Location 2 shows only its own inspections	EXPECTED RESULT Inspections created under Location 1 do not appear. Counts reflect Location 2 data only.	☐
94	ACTION Create a new DVI under Location 2	EXPECTED RESULT Inspection saved. Only visible when Location 2 is active.	☐
95	ACTION Switch back to Location 1	EXPECTED RESULT Location 1 inspections return. Location 2 inspection not visible.	☐

TEST COMPLETION SIGN-OFF

Total Steps: 95 | Sections: 16 | Estimated Time: 45–60 minutes

Tester Name: _____ Date: _____ Pass / Fail: _____

Signature: _____ Notes: _____
