

Recent Features — Test Procedures

Redlined1 Auto Repair SaaS

Version 1.0 | Date: 2026-06-19 | Covers 6 feature areas

Features Covered in This Document

1. Time Tracking — clock in/out, sessions, stat cards, CSV export
2. Payment Stat Card Hover Tooltips — Collected, Void, Refunded, Today
3. Payment Date & Time — local timezone (not UTC)
4. Invoice Payment Reflection — Amount Received / Balance Due display
5. Parts Inventory — decimal input, leading zeros, save error messages
6. Inspection Share Link — modal popup, copy to clipboard

Each section below is a self-contained test. Run them in any order. Each has its own Pass/Fail sign-off.

TEST 1 — Time Tracking

Pre-conditions

- & You have at least one technician in the Technicians module
- & Settings ! Feature Toggles ! Time Tracking is ON
- & At least one Job Card exists (e.g. JC-0001)

Step 1.1 — Stat Cards (no entries yet)

Navigate to the Time Tracking module in the left sidebar.
Observe the four stat cards at the top of the page.

Expected: Hours Today = 0, Hours This Week = 0, Active Now = 0, Total Entries = 0

Step 1.2 — Clock In

In the Clock In form, select a technician from the dropdown.
Enter a Job Card number (e.g. JC-0001).
Add a note: "Test session A".
Click Clock In.

Expected: Session appears in Active Sessions with a green Clock Out button and a live timer counting up.
& Active Now stat card increments to 1
& Total Entries increments to 1

Step 1.3 — Clock Out

Click the green "Clock Out" button on the active session.

Expected: Session moves from Active Sessions to the Time Log table with a calculated duration (e.g. 0h 2m).
& Active Now returns to 0
& Hours Today increments to reflect the logged duration

Step 1.4 — Date Filters

Click "Today" filter. Verify the just-logged entry appears.
Click "This Week" filter. Verify the entry still appears.
Click "All Time". Verify all entries appear.
& Footer total hours updates correctly for each filter

Step 1.5 — Delete an Entry

Click the trash/delete icon on the test entry in the Time Log.

Expected: Entry is removed from the table. Total Entries decrements.

Step 1.6 — CSV Export

Log at least 2 time entries (clock in + out twice).
Click "Export CSV" at the top of the module.

Expected: A .csv file is downloaded. Open it — verify columns: Technician, Job Card, Clock In, Clock Out, Duration (minutes), Notes.
& All logged entries appear in the CSV
& Duration column contains numbers (minutes)

Date: _____

Result:

& PASS & FAIL

Notes:

TEST 2 — Payment Stat Card Hover Tooltips

Pre-conditions

- & At least 3 payments exist with status: Collected
- & At least 1 payment exists with status: Void
- & At least 1 payment exists with status: Refunded

If you do not have these, create them using the Record Payment form before running this test.

Step 2.1 — Total Collected Hover

Navigate to Payments module.

Hover the mouse over the "Total Collected" stat card.

Expected: A dropdown popup appears below the card listing each collected payment with: customer name, date & time, invoice number, method, reference, and amount.

- & Dollar amounts in the popup sum to the value shown on the card
- & Void and Refunded payments are NOT in this list

Step 2.2 — Voided Hover

Hover over the "Voided" stat card.

Expected: Dropdown shows only Voided payments. Each row shows: customer, date/time, invoice#, method, reference, amount.

- & Count matches the number shown on the card

Step 2.3 — Refunded Hover

Hover over the "Refunded" stat card.

Expected: Dropdown shows only Refunded payments. Same columns as above.

- & Count matches the card value

Step 2.4 — Today Hover

Hover over the "Today" stat card.

Expected: Dropdown shows payments recorded today only (any status except Void/Refunded).

- & All listed payments have today's date

Step 2.5 — Cards With No Data

If the Voided or Refunded card shows 0, hover over it.

Expected: No dropdown appears (or an empty state is shown) — the card does not crash or show blank rows.

Pass / Fail Sign-Off

Result:

& PASS & FAIL

Notes:

TEST 3 — Payment Date & Time (Local Timezone)

Pre-conditions

- & You know your local timezone (e.g. Asia/Bangkok = UTC+7)
- & You can see the clock on your computer

Step 3.1 — New Payment Date Defaults to Local Time

- Navigate to Payments module.
- Click "Record Payment" to open the payment form.
- Look at the date/time field.

Expected: The date/time field shows the current local time, NOT UTC time. Example: if it is 10:00 AM in Bangkok (UTC+7), the field should show 10:00 — NOT 03:00.

- & Hour matches your local clock
- & Date matches today's local date

Step 3.2 — Close and Reopen

- Close the payment form without saving.
- Wait 2 minutes.
- Open the form again.

Expected: Date/time field shows the NEW current time — not the time from before (frozen time bug is fixed).

Step 3.3 — Edit Existing Payment

- Click Edit on any existing payment.
- Check the date/time field in the edit form.

Expected: The field shows the payment's original time in local timezone. If payment was recorded at 10:00 AM local time, field should show 10:00 — NOT 03:00 (UTC offset).

- & Displayed time matches when you remember recording the payment

Date: _____

Result:

& PASS & FAIL

Notes:

TEST 4 — Invoice Payment Reflection

Pre-conditions

- & At least 1 invoice exists (e.g. INV-0005) with a known total (e.g. \$200.00)
- & No payments are recorded for that invoice yet

Step 4.1 — Invoice Shows No Payment Row Before Recording

Navigate to Invoicing module.
Click on the test invoice (e.g. INV-0005).
Scroll to the bottom of the invoice detail panel.

Expected: Only the Total row is visible. No "Amount Received" or "Balance Due" rows appear.

Step 4.2 — Record a Partial Payment

Navigate to Payments module.
Click Record Payment.
Enter amount: \$100.00 (half the invoice total).
Set Invoice Number to INV-0005.
Set status to Collected. Save.

Step 4.3 — Verify Invoice Shows Partial Balance

Return to Invoicing module.
Click INV-0005.

Expected: "Amount Received: -\$100.00" appears below Total. "Balance Due: \$100.00" appears below that.
& Amount Received is negative (shown as deduction)
& Balance Due = invoice total minus payment amount

Step 4.4 — Record Full Payment

Go back to Payments.
Record a second payment of \$100.00 linked to INV-0005, status Collected.
Return to INV-0005 in Invoicing.

Expected: "Amount Received: -\$200.00" and "Balance Due: PAID IN FULL" (in green text).
& "PAID IN FULL" is displayed instead of \$0.00

Step 4.5 — Void a Payment — Balance Returns

In Payments, change one of the \$100.00 payments on INV-0005 to status Void.
Return to INV-0005 in Invoicing.

Expected: "Amount Received: -\$100.00" and "Balance Due: \$100.00" — the voided payment is excluded from the total.

Result:

& PASS & FAIL

Notes:

TEST 5 — Parts Inventory Improvements

5A — Decimal Price Input

Navigate to Parts Inventory. Click "Add Part".

In the Cost field, type: 18.50

Expected: Field shows "18.50" — the period is not eaten/removed while typing.

& After tabbing away, field shows 18.5 (trailing zero trimmed is acceptable)

Clear the field. Type: 0.50

Expected: Field shows "0.50" — leading zero is preserved (it is valid before a decimal).

Clear the field. Type: 5.00

Expected: Field shows "5.00" during typing. On blur, shows 5.

5B — Leading Zeros Removed

In the Quantity field, type: 05

Expected: Display shows "5" — the leading zero is stripped automatically.

& Result is not empty — "00" stripping does not blank the field

In the Cost field, type: 0050

Expected: Field shows "50" after stripping — not "" (empty).

5C — Click to Select All

Click inside the Cost or Retail field when it already has a value.

Expected: All text in the field is selected automatically (so you can type a replacement value immediately).

5D — Save Error Display

Create two parts with the same Part Number (e.g. PN-TEST-001).

Save the first part successfully.

Try to add a second part with the same Part Number and click Save.

Expected: A red error banner appears at the top of the form with text like: "duplicate key value violates unique constraint..."

& Error message is visible and readable — not just "Save failed:" with no detail

& Form stays open so you can correct the part number

5E — Cost Value & Retail Value Stat Cards

Add a part: Qty=10, Cost=\$20.00, Retail=\$35.00.

Expected: Cost Value stat card shows \$200.00 with sub-label "10 units × avg \$20.00".

Expected: Retail Value stat card shows \$350.00 with sub-label "10 units × avg \$35.00".

& Both stat cards reflect the part you just added

Result:

& PASS & FAIL

Notes:

TEST 6 — Inspection Share Link Modal

Pre-conditions

& At least 1 completed inspection exists

Step 6.1 — Open Share Modal

Navigate to Inspections. Click on any completed inspection.

Click the "Share Link" button in the action bar.

Expected: A centered modal popup appears over the page. It contains: the full URL in a text box, a "Copy Link" button, and a Close button.

& Modal is centered on screen regardless of scroll position

& Background is darkened (semi-transparent overlay)

Step 6.2 — Copy Link

Click the "Copy Link" button inside the modal.

Expected: Button text changes to "Copied to clipboard!" (green). The URL is now in your clipboard.

Open a new browser tab and paste (Ctrl+V). The URL should appear.

Expected: URL format: `https://redlined1.com/inspection/[token]` where token is a 32-character string.

Step 6.3 — Customer View

Open the copied URL in a private/incognito window (not logged in).

Expected: The inspection report loads without requiring login. Shows vehicle info, checklist results, tech notes, and photos.

& Customer can see Fail / Attention / Pass / N/A results

& No admin UI or edit buttons are visible to the customer

Step 6.4 — Close Modal (3 methods)

Method A: Click the 'X' button in the top-right of the modal.

Expected: Modal closes. Share Link button returns to normal (not stuck showing "...").

Open modal again. Method B: Click the "Close" button at the bottom.

Expected: Modal closes. Button is not stuck.

Open modal again. Method C: Click outside the modal (on the dark overlay).

Expected: Modal closes. Button is not stuck.

Step 6.5 — Repeated Clicks Return Same URL

Click Share Link on the same inspection a second time.

Expected: Modal shows the same URL as the first time — the token is not regenerated on each click.
